

Offer of advertising and promotions on the e-autonaprawa.pl portal

E-autonaprawa.pl is a portal for car mechanics and the automotive aftermarket industry, which deals with technical and business issues of automotive workshop facilities in the field of servicing, diagnostics and repairs of road vehicles, and also performs integration functions in relation to business entities operating in this industry.

It presents information about technical, market and legal and economic events and news. It contains articles about achievements of automotive technology in the field of vehicle construction, diagnostic methods and repair technologies that are important for workshop practice. It allows you to get acquainted with offers for automotive services and workshops. The portal has been published since 2009 and has a constantly growing range of press and expert publications that are displayed by popular search engines.

Mailings are sent to registered users only twice a month and this is well received by their recipients. The website generates from 32 000 to 40 000 visits per month from unique users who are interested in specialized information related to workshop repairs and automotive aftermarket.
